| Preparation of Metallic Particles and Ribbons for Auger Electron Microanalysis, 35:127 | Characterization of Fe-Supersaturated Fe-Al Bronze Coatings Fabricated by Magnetron Sputter Deposition, 35:207 |
| Serrated Grain Boundaries in Hot-Worked Aluminum Alloys at High Strains, 34:251 | Observations on the Influence of Microstructure on Electrolytic Tinplate Corrosion, 34:143 |

Crystallography

- Aboav-Weaire's and Lewis' Laws—A Review, 34:149
- Characterization of γ' -Fe₄N Precipitates in a Compound Layer Formed by Austenitic Nitrocarburizing Treatment, 34:213
- Crystallographic Characterization of Planes in the Scanning Electron Microscope, 34:29
- Semiautomatic Measurement of Individual Orientation of Crystals by Using Etch Pits and Digitized Images, 34:189
- SiC-Al Interface Crystallographic Orientation Relationship in a Squeeze-Cast SiCw/Al Composite, 34:227
- TEM Studies of ETA Carbide Precipitate Particles in a DS Cast Ni₃Al Base Superalloy, 34:205

Editorials

35:1

Electron Microscopy (all types)

- Atomic Force Microscopy Imaging to Measure Precipitate Volume Fraction in Nickel-Based Superalloys, 34:265
- Atomic Force Microscopy Observations of Pitting Corrosion and Inhibition on 7075-T651 Aluminum Alloy in Hydrochloric Acid Solutions, 35:73
- Characterization of γ' -Fe₄N Precipitates in a Compound Layer Formed by Austenitic Nitrocarburizing Treatment, 34:213
- Configurations of Pt and Mn in Iron Disilicides, 35:195
- Crystallographic Characterization of Planes in the Scanning Electron Microscope, 34:29
- Determination of the Aspect Ratio of a Spheroidal Particle by Stereo Observation, 34:167
- FT-IR Spectrometry in Materialography, 35:113
- In Situ Transmission Electron Microscopy Study of Ordering in a Splat-Cooled Ni-20 At.% Mo Alloy, 34:87
- The Microstructures of Multiphase Ni-20Al-30Fe and Its Constituent Phases, 34:181
- Observations on the Influence of Microstructure on Electrolytic Tinplate Corrosion, 34:143
- Preparation of Metallic Particles and Ribbons for Auger Electron Microanalysis, 35:127
- Semiautomatic Measurement of Individual Orientation of Crystals by Using Etch Pits and Digitized Images, 34:189
- SiC-Al Interface Crystallographic Orientation Relationship in a Squeeze-Cast SiCw/Al Composite, 34:227
- Surface Roughness Characterization of NicalonTM and HI-NicalonTM Ceramic Fibers by Atomic Force Microscopy, 35:199
- TEM Studies of ETA Carbide Precipitate Particles in a DS Cast Ni₃Al Base Superalloy, 34:205
- True Size Distribution of Simple Polyhedral Particles Obtained from TEM Images of Extraction Replicas, 34:173

Failure Analysis

- A Failure Analysis Case Study: Structural Steel Sign Post Collapse, 34:57
- A Failure Analysis Case Study of a Radio Transmission Tower, 34:51

Fractography

- Effect of Cold Working on the Fracture Characteristics of a Mild Steel Exposed to A Sour Gas Environment, 34:43
- Effect of Morphology of Nonmetallic Inclusions on Tensile Properties of Quenched and Tempered 0.4C-Cr-Mo-Ni Steel, 34:121
- Fractographic Aspects of Fatigue of Sintered Ni-Steels, 34:129
- A Note on Stretch Zones in an Al-Zn-Mg Alloy, 34:217

Hydrogen in Metals

- Application of the Hydrogen Microprint and the Microautoradiography Techniques to a Duplex Stainless Steel, 34:97
- Effect of Cold Working on the Fracture Characteristics of a Mild Steel Exposed to A Sour Gas Environment, 34:43

Image Analysis

- Atomic Force Microscopy Imaging to Measure Precipitate Volume Fraction in Nickel-Based Superalloys, 34:265
- Investigation of Liquid-Phase Sintering by Image Analysis, 34:271
- Semiautomatic Measurement of Individual Orientation of Crystals by Using Etch Pits and Digitized Images, 34:189

Inclusions/Second Phase Particles

- Effect of Morphology of Nonmetallic Inclusions on Tensile Properties of Quenched and Tempered 0.4C-Cr-Mo-Ni Steel, 34:121
- Fractographic Aspects of Fatigue of Sintered Ni-Steels, 34:129
- TEM Studies of ETA Carbide Precipitate Particles in a DS Cast Ni₃Al Base Superalloy, 34:205
- True Size Distribution of Simple Polyhedral Particles Obtained from TEM Images of Extraction Replicas, 34:173

Life Assessment

- High-Temperature Corrosion-Fatigue (Circumferential) Cracking Life Evaluation Procedure for Low Alloy (Cr-Mo) Boiler Tube Steels, 34:81

Lightweight Materials

- Application of Microstructural Engineering to the Processing of Lightweight Materials, 35:69
- Lightweight Materials for Aircraft Applications, 35:41

Liquid Phase Sintering

- Investigation of Liquid-Phase Sintering by Image Analysis, 34:271

Mechanical Behavior: Creep; Fatigue; Fracture

- Combined Effects of Deformation (Strain and Strain State), Grain Size, and Carbon Content on Carbide Precipitation, and Corrosion Sensitization in 304 Stainless Steel, 35:99
- Effect of Morphology of Nonmetallic Inclusions on Tensile Properties of Quenched and Tempered 0.4C-Cr-Mo-Ni Steel, 34:121
- Fractographic Aspects of Fatigue of Sintered Ni-Steels, 34:129
- High-Temperature Corrosion-Fatigue (Circumferential) Cracking Life Evaluation Procedure for Low Alloy (Cr-Mo) Boiler Tube Steels, 34:81
- Lightweight Materials for Aircraft Applications, 35:41
- Microstructural Corrosion Behavior of a Cold-Worked Steel in a Sour Environment, 34:35
- A Note on Stretch Zones in an Al-Zn-Mg Alloy, 34:217
- Serrated Grain Boundaries in Hot-Worked Aluminum Alloys at High Strains, 34:251
- Stress Rupture Property—Microstructure Correlation in Hot-Rolled Superalloy 718, 35:93

Mechanisms (Theory)

- Proposed Revision to the Hall-Petch Relationship for Single-Phase Imperfect Polycrystals, 34:231
- Some Applications of the Hall-Petch Relationship for Single-Phase Imperfect Polycrystals, 34:237

Metallic Glasses

- Properties and Structures of Fe-Based Metallic Glasses, 35:153

Metallographic Preparation

- Etching and Microstructure of Engineering Ceramics, 34:1
- Preparation of Metallic Particles and Ribbons for Auger Electron Microanalysis, 35:127
- Wetting Agents in Metallography, 35:135

Meteorites

- Microstructural Observations and Mechanisms of Lamellar Coarsening in Iron Meteorites, 35:229
- Surface Morphology of Iron Dendrites in the Yanzhuang H6 Meteorite, 35:165

Microautoradiography

- Application of the Hydrogen Microprint and the Microautoradiography Techniques to a Duplex Stainless Steel, 34:97

Microstructural Characterization: Composites

- FT-IR Spectrometry in Materialography, 35:113
- Influence of Microstructure on the Corrosion Resistance of AISI Type 304L and Type 316L

- Sintered Stainless Steels Exposed to Ferric Chloride Solution, 35:145

Lightweight Materials for Aircraft Applications, 35:41

- SiC-Al Interface Crystallographic Orientation Relationship in a Squeeze-Cast SiCw/Al Composite, 34:227

- Surface Roughness Characterization of Nicalon™ and HI-Nicalon™ Ceramic Fibers by Atomic Force Microscopy, 35:199

Microstructural Characterization: Metals

- Characterization by CEMS, XRD, and XPS of Oxidized Layers Formed on the Surface of Carbonitrided Low-Carbon Steel, 34:241
- Characterization of γ' -Fe₄N Precipitates in a Compound Layer Formed by Austenitic Nitrocarburizing Treatment, 34:213
- A Failure Analysis Case Study: Structural Steel Sign Post Collapse, 34:57
- A Failure Analysis Case Study of a Radio Transmission Tower, 34:51
- Influence of Thermal Cycling on the Microstructure of a Ferritic-Austenitic Duplex Stainless Steel, 34:277
- Method for Tungsten Grain Size Analysis in Coiled Lamp Filaments, 34:195
- Microscopic Observation of γ -Phase and ϵ and α' -Martensite in Fe-Mn-Si-Based Shape Memory Alloys, 34:67
- Microstructural Observations and Mechanisms of Lamellar Coarsening in Iron Meteorites, 35:229
- The Microstructures of Multiphase Ni-20Al-30Fe and Its Constituent Phases, 34:181
- Properties and Structures of Fe-Based Metallic Glasses, 35:153
- Serrated Grain Boundaries in Hot-Worked Aluminum Alloys at High Strains, 34:251
- Stress Rupture Property—Microstructure Correlation in Hot-Rolled Superalloy 718, 35:93
- Surface Morphology of Iron Dendrites in the Yanzhuang H6 Meteorite, 35:165
- TEM Studies of ETA Carbide Precipitate Particles in a DS Cast Ni₃Al Base Superalloy, 34:205

Microstructural Characterization: Nonmetals

- Aluminum Alloy / Alumina-Based Ceramic Interactions, 35:11
- Characterization by CEMS, XRD, and XPS of Oxidized Layers Formed on the Surface of Carbonitrided Low-Carbon Steel, 34:241
- Etching and Microstructure of Engineering Ceramics, 34:1
- FT-IR Spectrometry in Materialography, 35:113
- Microstructural Characterization of Reaction-Formed Silicon Carbide Ceramics, 35:221
- Microstructural Control of Aluminum Sheet Used in Automotive Applications, 35:23
- Surface Roughness Characterization of Nicalon™ and HI-Nicalon™ Ceramic Fibers by Atomic Force Microscopy, 35:199

Modeling

- Aboav-Weaire's and Lewis' Laws—A Review, 34:149
- Microstructural Modeling of Solidification in A356 Alloy, 35:175
- Monte-Carlo Study of Angular and Edge Length Distributions in a Three-Dimensional Poisson-Voronoi Tessellation, 34:15

Nickel Alloys

- In Situ Transmission Electron Microscopy Study of Ordering in a Splat-Cooled Ni-20 At.% Mo Alloy, 34:87
- The Microstructures of Multiphase Ni-20Al-30Fe and Its Constituent Phases, 34:181

Oxidation, Corrosion, Environmental Interactions

- Atomic Force Microscopy Observations of Pitting Corrosion and Inhibition on 7075-T651 Aluminum Alloy in Hydrochloric Acid Solutions, 35:73
- Characterization by CEMS, XRD, and XPS of Oxidized Layers Formed on the Surface of Carbonitrided Low-Carbon Steel, 34:241
- Combined Effects of Deformation (Strain and Strain State), Grain Size, and Carbon Content on Carbide Precipitation, and Corrosion Sensitization in 304 Stainless Steel, 35:99
- Effect of Cold Working on the Fracture Characteristics of a Mild Steel Exposed to A Sour Gas Environment, 34:43
- A Failure Analysis Case Study of a Radio Transmission Tower, 34:51
- FT-IR Spectrometry in Materialography, 35:113
- High-Temperature Corrosion-Fatigue (Circumferential) Cracking Life Evaluation Procedure for Low Alloy (Cr-Mo) Boiler Tube Steels, 34:81
- Influence of Microstructure on the Corrosion Resistance of AISI Type 304L and Type 316L Sintered Stainless Steels Exposed to Ferric Chloride Solution, 35:145
- Microstructural Corrosion Behavior of a Cold-Worked Steel in a Sour Environment, 34:35
- Observations on the Influence of Microstructure on Electrolytic Tinplate Corrosion, 34:143

Phase Transformations

- Characterization of γ' -Fe₄N Precipitates in a Compound Layer Formed by Austenitic Nitrocarburizing Treatment, 34:213
- High-Temperature Corrosion-Fatigue (Circumferential) Cracking Life Evaluation Procedure for Low Alloy (Cr-Mo) Boiler Tube Steels, 34:81
- In Situ Transmission Electron Microscopy Study of Ordering in a Splat-Cooled Ni-20 At.% Mo Alloy, 34:87
- Microscopic Observation of γ -Phase and ϵ and α' -Martensite in Fe-Mn-Si-Based Shape Memory Alloys, 34:67

- The Microstructures of Multiphase Ni-20Al-30Fe and Its Constituent Phases, 34:181
- Velocity of the Austenite-Martenite Interface in Reversible Martensitic Transformation in Fe-Ni-C Alloys, 34:105

Powder Metallurgy

- Influence of Microstructure on the Corrosion Resistance of AISI Type 304L and Type 316L Sintered Stainless Steels Exposed to Ferric Chloride Solution, 35:145

Process: Industrial/Chemical/Variables

- Effect of Process Variables on the Structure of Directionally Recrystallized MA-6000, 34:9
- Topotoxicity of the Hydrogen Reduction Process in Fused Iron Catalyst, 35:213

Quantitative Metallography

- Method for Tungsten Grain Size Analysis in Coiled Lamp Filaments, 34:195
- True Size Distribution of Simple Polyhedral Particles Obtained from TEM Images of Extraction Replicas, 34:173

Recrystallization

- Effect of Process Variables on the Structure of Directionally Recrystallized MA-6000, 34:9

Semiconductors

- Configurations of Pt and Mn in Iron Disilicides, 35:195
- Semiautomatic Measurement of Individual Orientation of Crystals by Using Etch Pits and Digitized Images, 34:189

Shape Memory: Alloys, Effect

- Microscopic Observation of γ -Phase and ϵ and α' -Martensite in Fe-Mn-Si-Based Shape Memory Alloys, 34:67
- Velocity of the Austenite-Martenite Interface in Reversible Martensitic Transformation in Fe-Ni-C Alloys, 34:105

Stereo Microscopy

- Determination of the Aspect Ratio of a Spheroidal Particle by Stereo Observation, 34:167

Superalloys

- Atomic Force Microscopy Imaging to Measure Precipitate Volume Fraction in Nickel-Based Superalloys, 34:265
- Stress Rupture Property—Microstructure Correlation in Hot-Rolled Superalloy 718, 35:93
- TEM Studies of ETA Carbide Precipitate Particles in a DS Cast Ni₃Al Base Superalloy, 34:205

Texture/Orientation

- Effect of Process Variables on the Structure of Directionally Recrystallized MA-6000, 34:9

Microstructural Control of Aluminum Sheet Used
in Automotive Applications, 35:23

Thermal Effects

Influence of Thermal Cycling on the Microstructure
of a Ferritic-Austenitic Duplex Stainless Steel, 34:
277

Thin Films

Some Applications of the Hall-Petch Relationship
for Single-Phase Imperfect Polycrystals, 34:237

Titanium Alloys

Lightweight Materials for Aircraft Applications, 35:
41

Tungsten Alloys

Method for Tungsten Grain Size Analysis in Coiled
Lamp Filaments, 34:195

Welding, Joining, Casting

Effect of Melt Superheat on Maximum Nuclei
Density in A356 Alloy, 35:81

A Failure Analysis Case Study of a Radio
Transmission Tower, 34:51

Microstructural Modeling of Solidification in A356
Alloy, 35:175
